

CAFM/IWMS SERVICES

Computer-Aided Facility Management (CAFM), also known as Integrated Workplace Management (IWMS), systems provide a critical link between facility floor plans and all the other facility related-data that makes an organization run. It truly is the missing link needed to connect an organization's BUILDINGS, SPACE, and PEOPLE + ASSETS. CAFM / IWMS systems provide quick access to credible information, presented in easily understood visual formats. Today's CAFM / IWMS systems support a wide range of tasks, including:

Space Management

Move Management

Asset Management

Maintenance Management

RSP i-SPACE provides the staff and expertise to help you choose and implement the right CAFM/IWMS solution for your organization. Our CAFM / IWMS related services include:

CAFM Business Case Development

CAFM Modifications and Enhancements

CAFM Needs Analyses

Custom CAFM Report Development

CAFM Vendor Selection

Outsourced CAFM Maintenance

CAFM Implementation and Integration

Poly-lining

With our blend of architecture, space planning, facilities management and technology experience, we understand the needs of the many stakeholders in a CAFM implementation, and can act as impartial consultants to help you identify your most critical needs, selecting the vendor that can best fit those needs and your budget.
